

How to use the Simultaneous interpretation in ZOOM

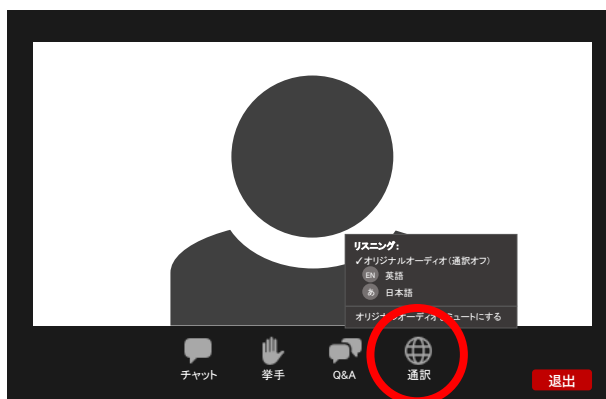

By setting the interpretation, you can listen to the audio in English.

1 After starting up ZOOM

When you start up the zoom before the forum begins, it shows Title screen.

2 Setting the interpretation

Choose "icon" (in red)
Your language of choice will appear in the menu

3 Choose Language

① Choose "English"

② if you mute the original audio, you will no longer hear it. You will only hear the interpreter's voice.

Things to be ready

Microphone or earphone microphone other than the one built into the computer

※Microphones built into computers are not recommended because they pick up ambient noise.

webcam

※Please turn on the video when speaking.

●Viewing Environment

PC

推奨

- macOS X , macOS X (10.10) ~
- Windows 10/11

Web browser

Chrome, Firefox, Edge, Safari
From the latest version to 2 previous versions

【Note】

For stable viewing, we recommend **installing the latest version of the Zoom application** on your computer and connecting to a wired LAN.

- When connected via Wi-Fi, viewing may not be stable.
- Please install the application at least one day in advance.
- It is possible to participate using a web browser without installing the application, but some functions will be limited.
- Please set your own device for viewing to adjust the volume.
- Please note that some content may not be available for viewing outside of the application.
